DAN CHRISTENSEN ENGINEER

605-890-0628 dan.christensen.design@gmail.com Candler, NC 28715

WHY HIRE ME?

I'm a skilled problem solver with a natural focus on efficiency.

Typically involves automating and streamlining common tasks for clients

saving my clients an estimated 360 hours of overtime each year, and an automated invoice program for Mark Simons' law firm, eliminating 10 hours of

(including data entry, reporting, and data analysis), often through writing code in Excel. Some projects include: a multi-faceted workbook for New Belgium Brewery,

Designed clutches and brakes for industrial equipment-- created/modified CAD models and drawings for new products as well as customized versions of existing

products, performed FEA analysis, built and tested new product prototypes, created supporting documentation for sales staff, analyzed product failures, and

developed procedures to fine tune performance of specific products.

EXPERIENCE

FREELANCE ENGINEER

May 2009 - Present

DESIGN ENGINEER

Sept 2007- May 2009

EDUCATION

MECHANICAL ENGINEERING

Graduated May 2007

SKILLS

PROGRAMMING

SOFTWARE

HANDS-ON WORK

SOUTH DAKOTA SCHOOL OF MINES & TECHNOLOGY

VBA: Writing macros and creating forms to solve problems and save money. JavaScript: Creating custom programs to easily run in a web browser. C: Working with microcontrollers (ARM/arduino) to make specialized devices.

Rapid City, SD. GPA: 3.98

SELF-EMPLOYED (CO, NC)

excess invoice processing each month.

NEXEN GROUP, INC (MN)

SolidWorks, MS Office, MathCad, PhotoShop.

I also specialize in designing and building custom pieces. This involves working safely with power tools, understanding workflow, and maintaining an organized and efficient workshop. My most recent project is a large, featured rotating sign seen on the New Belgium Brewery tour.
